**About Micron:** We are an industry leader in innovative memory and storage solutions transforming how the world uses information to enrich life for all. With a relentless focus on our customers, technology leadership, and manufacturing and operational excellence, Micron delivers a rich portfolio of high-performance DRAM, NAND and NOR memory and storage products. Every day, the innovations that our people create fuel the data economy, enabling advances in artificial intelligence (AI) and compute-intensive applications that unleash opportunities — from the data center to the intelligent edge and across the client and mobile user experience.

At Micron India, you will be a part of one of the fastest ramps in Indian semiconductor history. We are ranked among the Top 50 organizations for India's Best Workplaces in Manufacturing 2025 rankings by Great Place to Work Institute. In the last six years, we have built an operations footprint with 20 centres of excellence and grown to over 4000 team members. We nurture a culture that is fair, fearless and fun that works to enhance personal and professional development at every level.

**Culture and Values at Micron:** As a leader in memory solutions our team members, partners, customers, and leadership work closely together to deliver setting a high bar for ourselves and our industry. We believe transformation always starts from within and our core values are driven by the following 5 pillars:

- People - We care about each other.
- Innovation - We develop solutions that shape the world's future.
- Tenacity - Nothing shakes our resolve.
- Collaboration - We work as one team.
- Customer Focus - We win by knowing our customers

**About profile – AI Agentic Solutions - Internship**

Micron Technology's vision is to transform how the world uses information to enrich life and our commitment to people, innovation, tenacity, collaboration, and customer focus allows us to fulfill our mission to be a global leader in memory and storage solutions. This means conducting business with integrity, accountability, and professionalism while supporting our global community.

As an Agentic Solutions Intern, you will help design and prototype intelligent, LLM powered agents and workflows that integrate with Micron's engineering and manufacturing environments. Your work will contribute to scalable tools that improve productivity and quality for our product, design, process, and test engineering teams.

**Roles & responsibilities can include but are not limited to:**

- Prototype agentic workflows that support engineering use cases (e.g., spec interpretation, design/verification support, test-log triage), using modern agent frameworks and structured evaluation loops.
- Build intelligent agents with planning, tool-use, memory, and reflection capabilities using frameworks such as LangChain, LangGraph, CrewAI, or AutoGen.
- Integrate agents with enterprise tools (APIs, databases, EDA/modeling environments, and internal platforms) for end-to-end task execution.

- Participate in model evaluation (prompt-level and system-level) and iterate using feedback loops (e.g., prompt tuning/RLHF where appropriate).
- Collaborate with cross-functional partners—process/design engineers, product/test engineering, and data scientists—to translate problem statements into working prototypes.

**Qualification:**

- Strong foundation in Python and modern ML/LLM toolchains; comfort working with engineering/manufacturing datasets.
- Understanding of ML fundamentals (supervised/unsupervised/semi-supervised learning), data preparation, and basic evaluation.
- Exposure to LLM and RAG concepts and interest in agentic workflows; hands-on academic or project work preferred.
- Ability to extract and prepare data from common enterprise sources.
- Clear written and verbal communication; ability to collaborate across levels and disciplines.
- B.Tech / M.S / M.Tech in Data Science, Statistics, Mathematics, Computer Science, Electrical, ECE, Engineering Physics, Mechanical, Chemical, Metallurgy and Material Science
- CGPA requirements = 7.0 CGPA & Above

**Location:**

Hyderabad

**Micron by Numbers:**

- $25.11B FY24 annual revenue
- 170 on the 2025 Fortune 500
- 59,000 patents granted and growing
- 30+ major cities worldwide with Micron offices
- 11 manufacturing sites* and 12 customer labs
- 21 design center locations
- ~ 48,000 team members
- Official Website: http://www.micron.com
