About Micron: We are an industry leader in innovative memory and storage solutions transforming how the world uses information to enrich life for all. With a relentless focus on our customers, technology leadership, and manufacturing and operational excellence, Micron delivers a rich portfolio of high-performance DRAM, NAND and NOR memory and storage products. Every day, the innovations that our people create fuel the data economy, enabling advances in artificial intelligence (AI) and compute-intensive applications that unleash opportunities — from the data center to the intelligent edge and across the client and mobile user experience.

At Micron India, you will be a part of one of the fastest ramps in Indian semiconductor history. We are ranked among the Top 50 organizations for India's Best Workplaces in Manufacturing 2025 rankings by Great Place to Work Institute. In the last six years, we have built an operations footprint with 20 centres of excellence and grown to over 4000 team members. We nurture a culture that is fair, fearless and fun that works to enhance personal and professional development at every level.

Culture and Values at Micron: As a leader in memory solutions our team members, partners, customers, and leadership work closely together to deliver setting a high bar for ourselves and our industry. We believe transformation always starts from within and our core values are driven by the following 5 pillars:

- People - We care about each other.
- Innovation - We develop solutions that shape the world's future.
- Tenacity - Nothing shakes our resolve.
- Collaboration - We work as one team.
- Customer Focus - We win by knowing our customers

About profile – MCP Server Enablement & AI Agents – Internship

Join Micron Technology as an AI Agents & MCP Server Intern and work on next-gen intelligent engineering tools. You'll help build MCP servers, develop LLM-powered agents, and integrate them with Micron's internal engineering platforms to improve productivity and automation.

Roles & responsibilities can include but are not limited to:

- Build and configure Model Context Protocol (MCP) servers for engineering workflows
- Develop AI agents using LangChain, LangGraph, CrewAI, AutoGen, etc.
- Integrate agents with Micron tools, APIs, and databases
- Automate engineering tasks such as data extraction, debugging assistance, log analysis, and requirements interpretation
- Evaluate and improve agent performance through structured testing and prompt optimization

Qualification:

- Strong Python skills; familiarity with ML/LLM toolchains
- Understanding of ML basics and data handling
- Exposure to LLMs, RAG, or agentic workflows (academic projects welcome)
- Good problem-solving and communication skills

- B.Tech / M.S / M.Tech in Data Science, Computer Science, Electrical, ECE
- CGPA requirements = 7.0 CGPA & Above

Location:

Hyderabad

Micron by Numbers:

- $25.11B FY24 annual revenue
- 170 on the 2025 Fortune 500
- 59,000 patents granted and growing
- 30+ major cities worldwide with Micron offices
- 11 manufacturing sites* and 12 customer labs
- 21 design center locations
- ~ 48,000 team members
- Official Website: http://www.micron.com
